

**Name of Study:** Stanford University Autism and Developmental Disability Research Registry

**Location:** Autism and Developmental Disability Clinic at Lucile Packard Children's Hospital of Stanford University, Stanford, CA

**Eligibility Criteria:** Children and adults with Autism Spectrum Disorder ages 2 years and above.

**Principal Investigator:** Antonio Hardan, M.D.

**Contact Information:** Ms. Robin Libove, Research Coordinator, phone (650) 736-1235.

Dear IAN Research participant,

I am writing this letter to offer you or your child an opportunity to participate in the Stanford University Autism and Developmental Disability Research Registry. Your participation will allow researchers at Stanford University to contact you about future research studies that you may be eligible to participate in. Additionally, it will allow researchers to study your (child's) past, current and future medical history in order to help answer questions about the causes and treatment of Autism Spectrum Disorders.

We are currently recruiting children, adolescents, and adults diagnosed with Autism Spectrum Disorder ages 2 years and above. There is no time requirement on your part beyond signing the consent form and there is no charge to participate in the Research Registry. Although there are no immediate benefits for participating, we anticipate that the results of this study will be of benefit in the future for children, adolescents, and adults with Autism Spectrum Disorders.

If you are interested in participating or would like to learn more, please contact Robin Libove, our research coordinator, at (650) 736-1235.

Thank you in advance for your time and assistance. We look forward to hearing from you.

Sincerely,

Antonio Hardan, M.D.  
Director, Autism and Developmental Disabilities Clinic  
Child and Adolescent Psychiatry  
Lucile Packard Children's Hospital  
Stanford University School of Medicine
